

DIAMON-FUSION® LIMITED 15-YEAR COMMERCIAL GLASS WARRANTY

Commercial glass surfaces coated with the patented Diamon-Fusion® nano-coating are guaranteed to maintain contact angles of at least 70 degrees with sliding angles of no more than 30 degrees for 15 years, under normal wear and tear, as long as basic manufacturer maintenance is followed and no harsh or abrasive cleaners are not used.

No revitalization products of any kind are needed to satisfy this warranty, except where described in the commercial glass basic manufacturer maintenance recommendations.

DOUBLE YOUR WARRANTY: After the initial 15-year term commencing with the application of the nano-coating, Diamon-Fusion International (DFI) will extend your warranty for three (3) additional five (5) year periods provided that you should have DFI's Revitalizer product applied by an authorized applicator at the beginning of each five (5) year period.

DFI also warrants that Diamon-Fusion® chemically bonds to glass and creates a protective nano-coating that, when applied by trained professionals, the nano-coating is guaranteed not to haze, chip, crack, peel, or discolor for the lifetime of the glass.

In the event Diamon-Fusion® nano-coating fails to comply with this warranty, DFI will provide materials necessary for retreatment. DFI's liability is limited to the cost of replacing chemical materials and will in no way extend to indirect, incidental or consequential damages incurred in relationship to this product.

THE FOREGOING WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES OF ANY KIND INCLUDING ANY IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. COMPANY SHALL NOT BE LIABLE FOR INDIRECT, SPECIAL OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THIS PRODUCT. NOTE, SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATIONS MIGHT NOT APPLY TO YOU AS THE ORIGINAL PURCHASER. THIS LIMITED WARRANTY GIVES THE ORIGINAL PURCHASER SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS THAT VARY FROM STATE TO STATE.

COMPANY SHALL BE THE SOLE JUDGE AS TO WHETHER BASIC MANUFACTURER MAINTENANCE RECOMMENDATIONS HAVE BEEN FOLLOWED, AND IF IN COMPANY'S JUDGMENT THE PRODUCT FAILURE HAS ARISEN FROM IMPROPER MAINTENANCE OR FAILURE TO FOLLOW COMPANY'S RECOMMENDATIONS, THEN COMPANY SHALL BE RELEASED FROM ANY OBLIGATION OR LIABILITY UNDER THIS LIMITED WARRANTY.

DIAMON-FUSION® COMMERCIAL GLASS

BASIC MANUFACTURER MAINTENANCE RECOMMENDATIONS

DIAMON-FUSION® is an award-winning, innovative technology that **protects** any silica-based surface such as glass, ceramic tile, porcelain and granite. **DIAMON-FUSION®** was also developed to substantially reduce the time and effort needed to maintain such surfaces.

DIAMON-FUSION® is similar to non-stick cookware. While you can cook in uncoated pans, it is so much easier to clean if you cook with non-stick coated pans. The same is true with **DIAMON-FUSION®** on glass or other silica-based surfaces. While you still must maintain your **DIAMON-FUSION®** coated surface (like cleaning the pan), the time and effort required are significantly reduced.

Maintenance Recommendations

Commercial glass treated with **DIAMON-FUSION®** should be cleaned with soapy water, a washer and a squeegee. Cleaning should be noticeably easier, since **DIAMON-FUSION®** treated glass is much smoother, making dirt, dust and other environmental debris much less prone to stick to the glass. Please note, in extreme situations or where the environment has been manipulated (for example, where glass is exposed to sprinklers, pool cleaners, leaching and other forms of man-made water contact) a simple maintenance routine should be followed to keep deposits from developing on the coating over time. If this occurs, reconditioning with **DFI®'s Restoration Powder** and **Revitalizer** may be needed to keep the coating at peak performance.

Other cleaners that can be safely used with a paper or microfiber towel on **DIAMON-FUSION®** treated glass include non-ammonia based glass cleaner, a vinegar/water solution or other pH neutral glass cleaning products. Maintenance frequency on windows treated with **DIAMON-FUSION®** can be reduced by as much as 90% depending on environmental conditions and other factors.

You can expect **DIAMON-FUSION®** window treatment to last for many years as long as the maintenance instructions listed above are adhered to and a simple, basic rule is followed; **do not use harsh or abrasives cleaners on treated surfaces under any circumstances.**

If you have questions regarding the maintenance of your **DIAMON-FUSION®** treated surface, please contact Carl Christ, Director of On-Site Services at cchrist@diamonfusion.com or +1 949 388.8000.
